1. Claims 11-13 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made without traverse in Paper No. 4.

2. Applicant is requested to cancel claims 11-13 in any response here.

3. Claims 1-4, 7, 10 and 14-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over McAndrew et al US 5,963,336 in view of Kai JP 1-261832.

McAndrew et al discloses sampling of the exhaust from an IC manufacturing process and the control of such systems can be activated in response to alarm signals. Note abstract and *col.* 11, line 66-*col.* 12, line 30. It does not specifically disclose activation of the sampling in response to such a signal. However such would have been an obvious expedient to avoid unnecessary sampling and in view of the teach of Kai of particle measuring in response to a scattering triggering signal, a process analog to sampling in response to such a trigger since the counting of the particles in a particular batch of sample air could be considered to a sampling collection of that particular batch. The exact form of the particle collection would have been an obvious expedient selectable by the need to ensure desired sampling. Those claimed appears to be known. It is agreed that the references do not specifically disclose sampling in response to a control signal but it is held that such would have been an obvious

expedient in view of the teaching of controlled responses set forth therein for the reasons above.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kauer et al US 6,649,416 show a sampler/analyzer with feedback controlled sampling.

5. Claims 5-6 and 8-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Applicant's arguments filed Jan. 26, 2004 have been fully considered but they are not persuasive. Applicant's arguments are believed adequately addressed in the rejection. It is agreed that the inclusion of claims 8-9 in the statement of rejection in the last office action was erroneous.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
